

## 360° Sprayer on Aerosol Cans

### The Sprayer that Moves with You

The 360° Sprayer on our WCP-2 White Contrast Paint and 7HF Magnetic Particle aerosol cans allows for a consistent spray pattern at any angle during nondestructive testing.

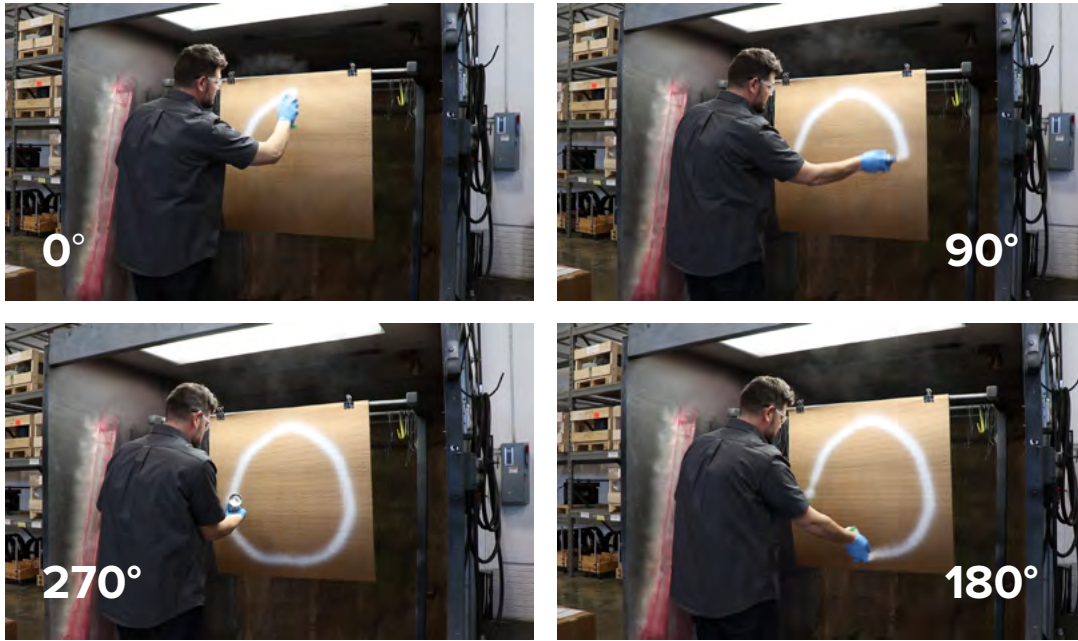

Reduce downtime and minimize wrist fatigue or physical body stress by spraying the product from any angle without having to twist your body into hard to reach places.

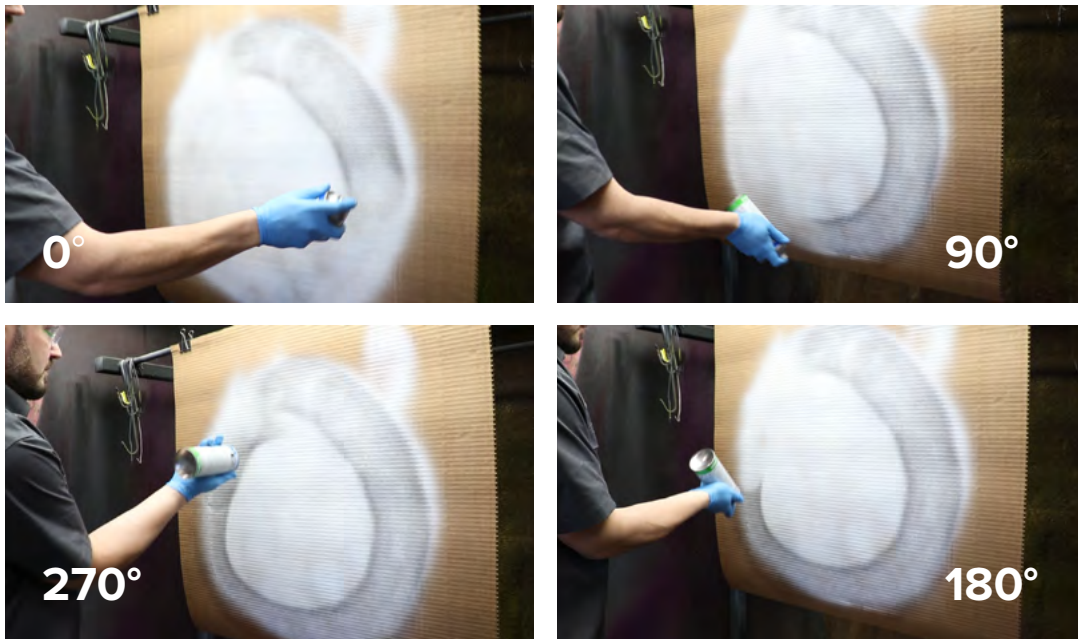

Improve inspection efficiency by evenly applying the product the first time because the 360° Sprayer won't sputter and splatter when turned upside down like others.
